SECTI	ON 1: Identification of t	he su	ıbstance/mixture a	nd of the company/undertaking		
1.1.	I. Product identifier					
	Trade name:	BIO	MOUNT NEW			
	Chemical name:	-				
	Catalogue number:	ВМ	N-X**			
1.2.	Relevant identified use	es of t	he substance or mix	ture and uses advised against		
	Uses:		For covering micro	scope sections and mounting covering glasses.		
	Uses advised against: On		Only the identified	uses are advised.		
Keacon why lices advised it is				nded for use only as an <i>in vitro</i> diagnostic medical device, gency for Medicinal Products and Medical Devices and to use it for other purposes.		
1.3.	Details of the supplier	of the	e safety data sheet			
	Supplier:	Supplier:		BioGnost Ltd.		
	Address:		Medjugorska !	Medjugorska 59, Zagreb		
	Telephone number:		+385 1 24099	+385 1 2409997		
	Telefax:		+385 1 24040	+385 1 2404039		
	e-mail of competent p	ersor	n: <u>msds@biognc</u>	msds@biognost.hr		
	National contact:		-	-		
1.4.	Emergency telephone	Emergency telephone numbers				
	National Protection an	d Res	scue Directorate:	112		
	Medical information:			+385 1 2348 342		
	Other information:			-		

SECTIO	SECTION 2. Hazards identification						
2.1.	Classification of the substance	Classification of the substance or mixture					
2.1.1.	Classification according to Reg	gulation (EC) No 12	72/2008 (CLP)				
	Hazard class and category code: Warning statements*:						
	Aspir. Tox. 1		H304				
2.1.2.	Additional information						
	EUH066	EUH066					
* For fu	ıll text of Hazard- and EU Hazard	d-statements: see S	ECTION 16				
2.2.	Label elements						
	Product identification: BIOMOUNT NEW						
	Identification number:	Identification number: -					
	Authorisation number:	-					

Page 2 of 19

Trade name:		BIOMOUNT NEW							
Product code:	BMN-X**	Date of compilation:	14 November 2022	Version:	4				

	Hazard pictograms:	GHS08			
	Signal word:	Danger			
	Hazard statement:	H304 May be fatal if swallowed and enters airways. EUH066 Repeated exposure may cause skin dryness or cracking.			
	Precautionary statements:	P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor. P331 Do NOT induce vomiting. P405 Store locked up. P501 Dispose of contents and container in accordance with local regulations.			
	Supplemetal hazard information (EU):	-			
2.3.	Other hazards				
	Environmental Hazards: No significant hazards. Material does not meet the criteria for PBT or vPvB in accordance with REACH Annex XIII. Endocrine Disrupting Properties: No known endocrine disrupting properties.				

SECTION 3. Co	SECTION 3. Composition/information on ingredients								
CAS/ EC/ Index number	REACH Registration No	Weight % content (or range)	Identification name	Classification according to Regulation (EC) No 1272/2008 (CLP)					
- 920-901-0 -	01-2119456810-40	70 – 90 %	Hydrocarbons, C11- C13, isoalkanes, <2% aromatics	Aspir. tox. 1; H304 EUH066					

SECTION	SECTION 4. First aid measures					
4.1.	Description of first aid me	Description of first aid measures				
	General notes: If the suggested first aid measures do not prove sufficient, seek medical attention.					
	Following inhalation:	Immediately remove from further exposure. Get immediate medical assistance. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Give supplemental oxygen, if available. If breathing has stopped, assist ventilation with a mechanical device.				

Page 3 of 19

Trade name:		BIOMOUNT NEW							
Product code:	BMN-X**	Date of compilation:	14 November 2022	Version:	4				

	Following skin contact:		Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse.
	Following eye contact:		Flush thoroughly with water. If irritation occurs, get medical assistance.
	Following ingestion:		DO NOT induce vomiting. Seek immediate medical attention.
	Self-protection of the first aider		-
4.2.	Most important symptoms and effects, both acute and delayed		
	Following inhalation:	No ii	mportant symptoms or effects.
	Following skin contact:	No ii	mportant symptoms or effects.
	Following eye contact:	No ii	mportant symptoms or effects.
	Following ingestion:	No ii	mportant symptoms or effects.
4.3.	Indication of any immediate medical attention and special treatment needed		medical attention and special treatment needed
	If ingested, material ma	ay be a	aspirated into the lungs and cause chemical pneumonitis. Treat appropriately.

SECTION	ON 5. Firefighting measures						
5.1.	Extinguishing media						
	Suitable extinguishing media:	Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.					
	Unsuitable extinguishing media:	Straight streams of water					
5.2.	Special hazards arising from the substance or mixture						
	Hazardous by products of fire:	moke, fume, incomplete combustion products, carbon oxides.					
5.3.	Advice for firefighters						
	water supply. Fire-fighters should	rom fire control or dilution from entering streams, sewers or drinking use standard protective equipment and in enclosed spaces, self-BA). Use water spray to cool fire exposed surfaces and to protect					
5.4.	Additional information						
	-						

SECTIO	SECTION 6. Accidental release measures					
6.1.	Personal precautions, protective equipment and emergency procedures					
6.1.1.	For non-emergency personnel					
	Protective equipment:	See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.				

Page 4 of 19

Trade name:	BIOMOUNT NEW						
Product code:	BMN-X**	Date of compilation:	14 November 2022	Version:	4		

	Accident prevention method	Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required, due to toxicity or flammability of the material. See Section 5 for fire fighting information.			
	Emergency procedures:	See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice.			
6.1.2.	For emergency responders:				
	Respiratory protection: half-face or full-face respirator with filter(s) for organic vapor and, when applicable, H2S, or self contained breathing apparatus (SCBA) can be used depending on the size of spill and potential level of exposure. If the exposure cannot be completely characterized or an oxygen deficient atmosphere is possible or anticipated, SCBA is recommended. Work gloves that are resistant to aromatic hydrocarbons are recommended. Note: gloves made of polyvinyl acetate (PVA) are not water-resistant and are not suitable for emergency use. Chemical goggles are recommended if splashes or contact with eyes is possible. Small spills: normal antistatic work clothes are usually adequate. Large spills: full body suit of chemical resistant, antistatic material is recommended.				
6.2.	Environmental precautions:				
	Large Spills: Dyke far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.				
6.3.	Methods and materials for co	ontainment and cleaning up			
6.3.1.	Bunding, covering of drains; capping procedures:	Land Spill: Stop leak if you can do so without risk. Water Spill: Stop leak if you can do so without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.			
6.3.2.	Cleaning up:	Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Recover by pumping or with suitable absorbent.			
6.3.3.	Other information:	Secure proper ventilation. Contact the responsible person; in case of larger			
6.4.	Reference to other sections				
	See Section 7 for information about secure handling. See Section 8 for information about personal protective equipment. See Section 13 for information about containment.				

SECTIO	SECTION 7. Handling and storage				
7.1.	Precautions for safe handling				
7.1.1.	Protection measures				
	Measures to prevent fire:	Avoid contact with skin. Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source).			

Page 5 of 19

Trade name:	BIOMOUNT NEW				
Product code:	BMN-X**	Date of compilation:	14 November 2022	Version:	4

	Measures to prevent aerosol and dust generation	n: Secure proper ventilation.			
	Measures to protect the environment:	When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during switch-loading operations). Use proper bonding and/or earthing procedures.			
	Other measures:	This material is a static accumulator. A liquid is typically considered a nonconductive, static accumulator if its conductivity is below 100 pS/m (100x10E-12 Siemens per meter) and is considered a semiconductive, static accumulator if its conductivity is below 10,000 pS/m. Whether a liquid is nonconductive or semiconductive, the precautions are the same. A number of factors, for example liquid temperature, presence of contaminants, anti-static additives and filtration can greatly influence the conductivity of a liquid.			
7.1.2.	Advice on general occupational hygiene:	eneral occupational hygiene:			
	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.				
7.2.	Conditions for safe storage, including any incom	Conditions for safe storage, including any incompatibilities			
ı					
	Technical measures and storage conditions:	Keep in a cool and well-ventilated area.			
	Technical measures and storage conditions: Packaging materials:	Keep in a cool and well-ventilated area. Teflon, polypropylene, stainless steel, carbon steel.			
	Packaging materials:	Teflon, polypropylene, stainless steel, carbon steel. The type of container used to store the material may affect static accumulation and dissipation. Keep container closed. Handle containers with care. Open			
	Packaging materials: Requirements for storage rooms and vessels:	Teflon, polypropylene, stainless steel, carbon steel. The type of container used to store the material may affect static accumulation and dissipation. Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Storage containers should be earthed and bonded. Fixed storage containers, transfer containers and associated equipment should be earthed and bonded			
7.3.	Packaging materials: Requirements for storage rooms and vessels: Advices for storage equipment:	Teflon, polypropylene, stainless steel, carbon steel. The type of container used to store the material may affect static accumulation and dissipation. Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Storage containers should be earthed and bonded. Fixed storage containers, transfer containers and associated equipment should be earthed and bonded to prevent accumulation of static charge. Suitable materials and coating are carbon steel, stainless steel, teflon, polyethylene, polypropylene. Unsuitable materials and coatings: butyl rubber, natural rubber, ethylene-proplyene-diene monomer (EPDM),

8.2.	Exposure controls				
8.2.1.	Appropriate engineering control	s			
	Substance/mixture related measures to prevent exposure during identified uses:	Do not eat, drink or smoke in the workspace. Use personal protective equipment. Wash hands after handling the product and before eating and/or drinking.			
	Structural measures to prevent exposure:	Adequate ventilation should be provided so that exposure limits are not exceeded. Use explosion-proff ventilation equipment.			
	Organisational measures to prevent exposure:	Organization of work in order to reduce other worker's influence during work process.			
	Technical measures to prevent exposure:	See Section 7.2			
8.2.2.	Personal protection equipment:	nent:			
8.2.2.1.	Eye and face protection:	If contact is likely, safety glasses with side shields are recommended.			
8.2.2.2.	Skin protection				
	Hand protection:	If prolonged or repeated contact is likely, chemical-resistant gloves are recommended. If contact with forearms is likely, wear gauntlet-style gloves. Nitrile, minimum 0.38 mm thickness or comparable protective barrier material with a high performance level for continuous contact use conditions, permeation breakthrough minimum 480 minutes in accordance with CEN standards EN 420 and EN 374.			
	Other skin protection:	If prolonged or repeated contact is likely, chemical, and oil resistant clothing is recommended.			
8.2.2.3.	Respiratory protection:	If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include: Half-face filter respirator Type A filter material, European Committee for Standardization (CEN) standards EN 136, 140 and			
0.2.2.3.	Respiratory protection.	405 provide respirator masks and EN 149 and 143 provide filter recommendations.			
		For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapour warning properties are poor, or if air purifying filter capacity/rating may be exceeded.			
8.2.2.4.	Thermal hazards:	No information available.			
8.2.3.	Environmental exposure controls				

Page 8 of 19

Trade name:	BIOMOUNT NEW				
Product code:	BMN-X**	Date of compilation:	14 November 2022	Version: 4	

Substance/mixture related measures to prevent exposure:	Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.
Structural measures to prevent exposure:	Use modern equipment.
Organisational measures to prevent exposure:	Adapt the work process to the required working conditions of the workplace.
Technical measures to prevent exposure:	See Section 6

13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage sys 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with currapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information:	Product	code:	BMN-X**	Date of compilation:	14 November	r 2022	Version: 4
Material does not meet the Reach Annex XIII criteria for PBT or vPvB. 12.6. Endocrine disrupting properties No known endocrine disrupting properties that affect the environment. 12.7. Other adverse effects No adverse effects are expected. SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curricapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.	Soil-Air	No in	formation available		n information		mation _
Material does not meet the Reach Annex XIII criteria for PBT or vPvB. 12.6. Endocrine disrupting properties No known endocrine disrupting properties that affect the environment. 12.7. Other adverse effects No adverse effects are expected. SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curricapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.							
12.6. Endocrine disrupting properties No known endocrine disrupting properties that affect the environment. 12.7. Other adverse effects No adverse effects are expected. SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry of Environmental and Na Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervision incineration at very high temperatures to prevent formation of undesirable combustion products.	12.5.						
No known endocrine disrupting properties that affect the environment. 12.7. Other adverse effects No adverse effects are expected. SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curr applicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.		Material d	oes not meet the Rea	ach Annex XIII criteria for F	PBT or vPvB.		
12.7. Other adverse effects No adverse effects are expected. SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with currapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.	12.6.	Endocrine	disrupting properties	5			
SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with currapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.		No known	endocrine disrupting	g properties that affect the	e environment.		
SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with currapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.	12.7	Other adv	orce offects				
SECTION 13. Disposal considerations 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage sys 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and waste constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curricapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.	12.7.			1			
 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage sys 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and waste constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with currapplicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products. 		No advers	e effects are expected	d			
 13.1. Waste treatment methods 13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage sys 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and w constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curr applicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products. 	SECTION	N 13. Dispo	osal considerations				
13.1.1. Product/Packaging disposal: Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage sys 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and w constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curr applicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.							
Submit for disposal to the legal person authorized by the Ministry of Environmental and Na Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curre applicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.							
Protection. Do not dispose of the product's remains into the sewage system. Submit the remains to collectors authorized by the ministry in charge. Do not dispose of the packaging into the sewage system. 13.1.2. Waste codes/waste designations according to Law: The European Waste Catalogue (EWC) code is specific to the waste generating process and we constituents. Determine the EWC according to the criteria provided in the European Waste Catalogue the hazardous waste list established by Commission Decision 2000/532/EC, as amended. 13.1.3. Waste treatment – relevant information: Disposal recommendations based on material as supplied. Disposal must be in accordance with curre applicable laws and regulations, and material characteristics at time of disposal. 13.1.4. Sewage disposal – relevant information: Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervisincineration at very high temperatures to prevent formation of undesirable combustion products.	13.1.1.	Product/Packaging disposal:					
The European Waste Catalogue (EWC) code is specific to the waste generating process and w constituents.
