SECTION	SECTION 4 FIRST AID MEASURES					
4.1.	Description of first aid measures					
	General notes:	-				
	Following inhalation:	Carry the afflicted person out of the contaminated area into a well-ventilated area or out for fresh air. If breathing becomes erratic or it stops, immediately apply artificial respiration (other than mouth-to-mouth) and contact a physician.				
	Following skin contact:	Remove contaminated clothing. Immediately wash with plenty of water and soap. Seek medical assistance if the symptoms of irritation remain.

	Self-protection of the first a	aider:	Treat symptomatically.	
4.2.	Most important symptoms	and eff	ects, both acute and delayed	
	Following inhalation:		lation of large amounts of vapors in inadequately ventilated perimeter cause coughing, sneezing, headache and nausea.	
	Following skin contact:	_	nt irritation. After short exposure, resorption effects are not likely. Long- n exposure may cause drying, cracking and tingling sensation of skin.	
	Following eye contact:		ct eye contact may cause slight to moderate irritation, lacrimation and ning sensation. If the symptoms persist, immediately call a physician.	
	Following ingestion:	Swallowing may cause irritation of mucosa, tingling sensation in the burning sensation; higher levels of concentration may cause nause abdominal pain and vomiting. In case of vomiting, aspiration cause coughing, difficult breathing. Higher levels of concentration may causefocation.
